R.N.

THE
VEINED VOLUTE.

GENERIC CHARACTER.

Animal resembling a Limax or Slug.

Shell unilocular, spiral.

Pillar twisted or plaited.

SPECIFIC CHARACTER, &c.

Subferruginous VOLUTE, with brown reticulated veins, subacute spines on the spires, five large plaits on the pillar, with three indistinct ones.

GREAT VEINED VOLUTE.

HEBREW VOLUTE.

The rare shell on the present plate is a native of the Indian and American seas, and is justly numbered among the most beautiful of its tribe. It is occasionally found of larger size than here represented.
